CURRICULUM VITAE · 2026.11

Dr. Howard Liao

Howard Liao, Ph.D.

Enterprise AI platform and digital transformation leader | VP of Technology / CIO / CISO

Applying for: IT AI Platform Lead, LITEON Technology (Neihu, Taipei)

+886-975-323161 · Liao.Howard@gmail.com

Personal summary

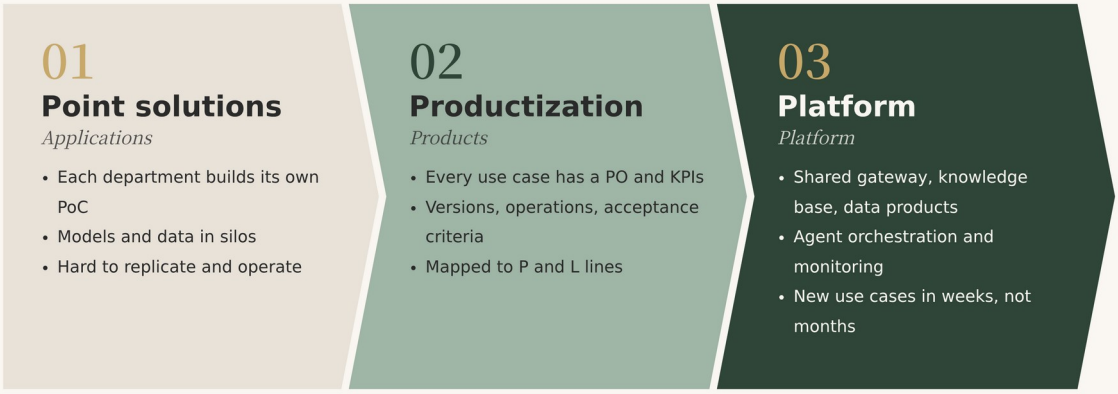

25+ years in IT and 15+ years as CIO and technology executive across electronics manufacturing, global software vendors and listed digital platforms. I turn board-level business goals into IT and AI investment portfolios, lead architecture decisions personally, and deliver results measured in yield, OEE and TCO. As an ISO 27001 and ISO 42001 Lead Auditor, I balance the speed of innovation with clear governance guardrails.

+15% **Product yield** Hongyan Technology | AI defect prediction	**+18%** **OEE** Hongyan Technology | Edge AIoT	**−25%** **IT operating cost** Hongyan Technology | System consolidation	**−30%** **Multi-cloud TCO** GameSparcs (6542) | FinOps
Zero downtime **Core services** GameSparcs (6542) | Platform migration	**−40%** **Delivery Lead Time** Sheng Xin / Sheng Qi Network | AI code review	**−30%** **Security incidents, year-on-year reduction** Sheng Xin / Sheng Qi Network | Zero trust	**+55%** **Process automation** Sheng Xin / Sheng Qi Network | Agentic AI

Advisory clients are not named for confidentiality; details can be discussed in person.

Core capabilities

Capability	Description	Representative results
Enterprise AI platform	Multi-LLM gateway, RAG knowledge base, multi-agent orchestration, human-in-the-loop	Agentic AI automation +55%
Manufacturing systems integration	SAP S/4HANA connected with MES, PLM and APS; Clean Core	Yield +15%, OEE +18%
Data platforms and data products	Lakehouse layers, master data, data contracts, global data management platform	Zero downtime for core services
Cloud-native and FinOps	Kubernetes, CI/CD, multi-cloud governance, cost allocation	Multi-cloud TCO −30%
Security and AI governance	ISO 27001/42001, zero trust, IEC 62443, DevSecOps	Security incidents −30% year on year
Organization and change	Building teams from zero, technical lead pipeline, PO development, ISO four-tier governance	Led multinational teams of 100+
Business communication	Reports directly to the Board and Global CIO; speaks the language of EBITDA, ROI and TCO	Quarterly investment committee

Goal: move AI from point solutions to a reusable platform with economic value visible to leadership

My core focus: move AI from point solutions to a reusable platform

Technical and managerial competencies

Technical competencies

AI platform architecture (LLM gateway/RAG/Agent)	●●●
AI in production (manufacturing)	●●●
AI in production (operations)	●●●
Data platforms and data products	●●●
SAP/PLM/MES integration	●●●
Cloud-native and platform engineering	●●●
MLOps/LLMOps	●●○
IT/OT security	●●●
AI governance	●●●

Managerial competencies

Defining priority AI domains	●●●
Budget and investment governance	●●●
Building teams and pipelines	●●●
Business leadership and PO development	●●○
Cross-department change	●●●
Reporting to leadership	●●●
External partners and SI management	●●●
Large-enterprise transformation	●●●

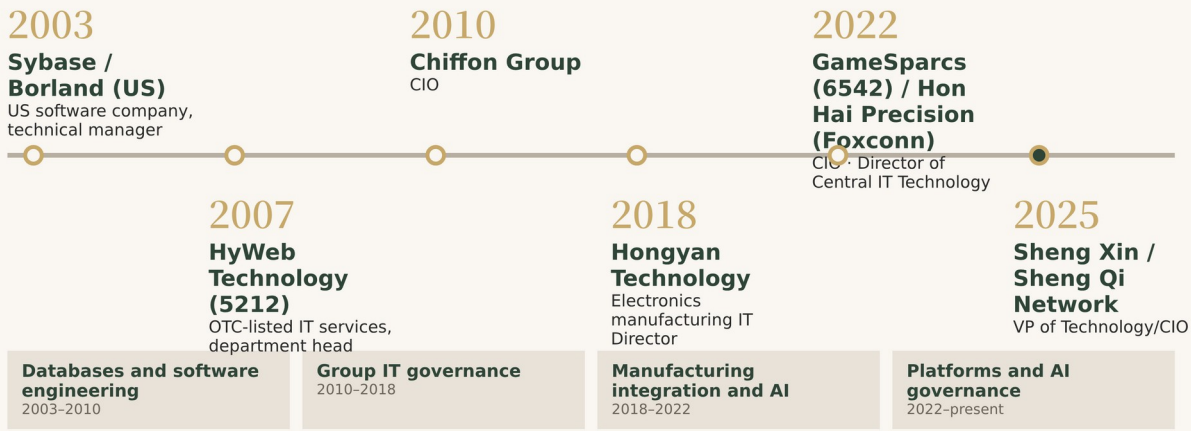

●●● Led and delivered ●●○ Led design or partial delivery

Leadership style

- **Go to the front line**: work alongside the business to break pain points into production-grade releases within weeks.
- **Empower the front line**: the platform team provides standards and components; business teams build their own use cases.
- **Keep knowledge in the team**: SOPs, architecture decision records and knowledge bases reduce reliance on any one person.
- **Talk in numbers**: every use case has a baseline, a target and an owner, reviewed openly each quarter.

Howard Liao Ph..

Career overview

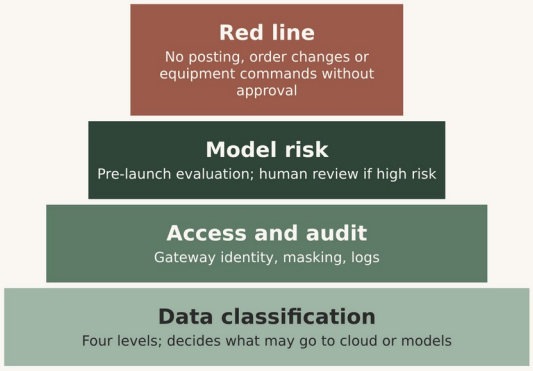

Period	Company | Title	Industry and location
2025.05 – present	Sheng Xin / Sheng Qi Network | VP of Technology/CIO	Multinational internet technology platform (Taipei, Kaohsiung, Shanghai)
2026	Enterprise information architecture advisor (part-time)	Multiple industries, clients not named
2022.09 – 2025.04	GameSparcs (6542) | Director of Information Technology (CIO/CISO)	OTC-listed digital technology platform (Taichung, Taipei, overseas)
2022	Hon Hai Precision (Foxconn) | Director of Central IT Technology	Global electronics manufacturing
2018.10 – 2022.09	Hongyan Technology | IT Director	Multinational electronics manufacturing (three sites in Taiwan, two in China)
2010 – 2018	Chiffon Group | CIO	Cross-industry holding group
2007 – 2010	HyWeb Technology (5212) | Department head	OTC-listed IT services
2003 – 2007	Sybase / Borland (US) | Technical manager	US enterprise software
Ongoing	Advisor to Taichung Veterans General Hospital; managing director of the Kang Shan Foundation	Healthcare and nonprofit

Sheng Xin / Sheng Qi Network | VP of Technology/CIO

- Reporting directly to the Board and the Global CIO, responsible for global application governance and delivery; group of about 500 with an IT team of 50+.
- Chaired the architecture review board and set API-first and Kafka/EDI/IDoc integration standards, eliminating point-to-point integrations.
- Built DevSecOps quality gates (SAST/DAST/SBOM) and introduced AI code review and test generation.
- Set AI usage rules and data classification under ISO 42001; ran AI workflow training for managers.
- Introduced Agentic AI workflows, with human-in-the-loop review for high-risk actions.
- Built an operational governance standardization program from scratch: four-tier documents, RACI, ISMS and AI governance.

+55%	−40%	−35%	−30%
Process automation	**Lead Time**	**Defect escape**	**Security incidents**

Competing for resources with the S/4HANA go-live
Before 2027 Q1, only use cases that do not touch SAP (quality, R and D knowledge)

Insufficient data quality
Build data products and unified definitions first, then models

PoC stuck at PoC
Define go-live criteria, PO and P and L line before starting

Shadow AI
Provide a good official platform plus usage rules, rather than only prohibiting

Runaway compute cost
Token/GPU cost allocated by BU, with quotas and monthly reports

AI governance approach: data classification, access audit, model risk and red lines

GameSparcs (6542) | Director of Information Technology

- Oversaw group multi-cloud infrastructure, security and data platforms (CIO/CISO responsibilities).
- Migrated core services from virtual machines to Kubernetes with CI/CD, halving the release cycle.
- Built a global data management platform with cross-region clusters to support global high-concurrency operations.
- Introduced FinOps and cost allocation; established ISO 27001 and a zero-trust architecture.
- Featured in an official APAC customer case by a global cloud provider, a CIO magazine cover interview, and a keynote at a global database vendor conference.

Zero downtime	−30%	×2
Core services	Multi-cloud TCO	Release speed

Hon Hai Precision (Foxconn) | Director of Central IT Technology (2022)

A global electronics manufacturing group. Responsible for group enterprise architecture decisions, gap analysis, business strategy translation and digital transformation planning, building a top-level design perspective on very large manufacturing networks and supply-chain architecture.

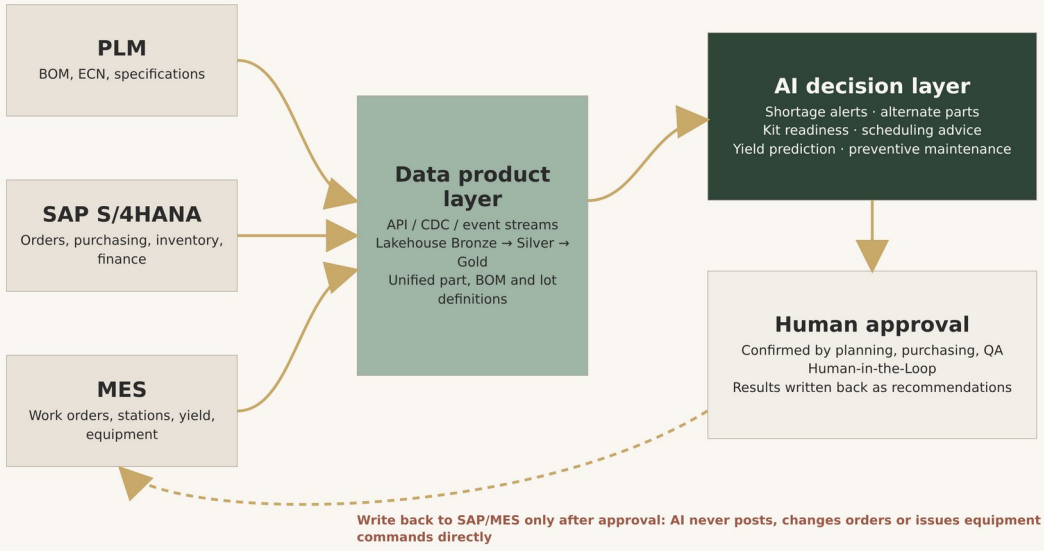

Howard Liao Ph.D.

Hongyan Technology | IT Director

- After the merger each plant ran independently with no capacity visibility, creating data silos and a large amount of slow-moving inventory.
- SAP S/4HANA standard functions first (Clean Core), connected with MES, PLM and APS.
- Edge AIoT data platform covering 1,000+ machines; built AI defect prediction and predictive maintenance models.
- Planned OT/IT segmentation per IEC 62443; built B2B EDI for brand customers.
- After system consolidation, group IT operating cost fell and plant capacity became visible daily.

+15%	+18%	−25%
Product yield	**OEE**	**IT operating cost**

Data first, then AI: a closed loop complementing SAP, PLM and MES

Manufacturing approach: connect PLM, SAP and MES data first, then AI recommendations with human approval

Earlier roles and advisory work

Period	Company | Title	Focus
2010 – 2018	Chiffon Group | CIO	Group IT governance, systems integration and building the data team
2007 – 2010	HyWeb Technology (5212) | Department head	SOA architecture, business portal, ITIL service governance, BPR process reengineering
2003 – 2007	Sybase / Borland (US) | Technical manager	Database, middleware and ALM technical consulting for Greater China; delivered for large financial and manufacturing clients
Ongoing	Advisor to Taichung Veterans General Hospital	Healthcare data integration and data protection
2022 – present	Managing director and CIO of the Kang Shan Foundation	Nonprofit digitalization, smart long-term care and donation system security

Enterprise information architecture advisory (2026)

Type	Content
Group IT strategy	Annual IT strategy and investment plan; presented to the CEO and executive committee; phased delivery with decision gates
Enterprise AI architecture	Enterprise information strategy and AI architecture blueprint: multi-model gateway, enterprise task hub, prediction core
Manufacturing systems integration	PLM/SAP/MES integration blueprint: API platform + data lakehouse, 90-day plan
Security governance	NIST CSF 2.0, 180-day security hardening plan, behavior analytics monitoring

For confidentiality, client names and project details are not disclosed.

Education, research and credentials

Degree	School	Research focus
Ph.D. in IT Management (2014)	Chaoyang University of Technology	Dissertation: A study of an integrated business self-service portal based on adaptive service-oriented architecture IT governance (archived at the National Central Library)
M.S. in Information Science (2006)	National Chung Hsing University	Data mining, decision support systems, cryptography; co-principal investigator of a healthcare cloud care project

Research and publications

- First author, SCI journal Multimedia Tools and Applications: Reversible secret-image sharing with high visual quality (2014)
- International journal paper: Utilizing GIS and GPS in Designing a Trilingual Tourist APP (2015)
- Long-standing thesis supervisor and reviewer for master's and doctoral students

Professional certifications

Area	Certifications
Security and AI governance	ISO 27001 Lead Auditor, ISO 42001 (AIMS) Lead Auditor
Projects and agile	PMP, ScrumMaster, Agile Coach, ESG Sustainability Manager
Systems and supply chain	ERP supply chain/manufacturing module certification, database vendor certified instructor, international barcode management certification
Continuing development	CISSP/CISM, cloud architect (in preparation)

External proof

Type	Content	Date
Vendor case study	Official APAC customer success video by a global cloud provider: container platform supporting global high concurrency with zero downtime	2024.03
Media interview	CIO magazine cover interview: using public cloud services to expand into global markets	2024.05
Technical feature	IT media feature: building a global data management platform	2024.09
Keynote	Keynote at a global database vendor conference in Taipei: a global-scale data management platform	2024.09
Keynote	CIO annual conference: seeing opportunity — cloud management in practice	2024.05
Public-sector course	Executive Yuan civil service e-learning platform course: cloud management in practice	2024.06

What I bring to LITEON

L5	**User access**	Enterprise messaging, portal, AI assistant interface, executive dashboards
L4	**AI products**	Supply-chain planning assistant, quality anomaly agent, R and D knowledge assistant, financial analysis assistant
L3	**Agent orchestration**	Multi-agent orchestration, workflow engine, human-in-the-loop approval
L2	**Models and knowledge**	LLM gateway (multi-model routing, quotas, cost), RAG knowledge base, ML model registry, evaluation
L1	**Data products**	Lakehouse (Bronze/Silver/Gold), master data, feature store, data contracts
L0	**Source systems**	SAP S/4HANA, PLM, MES, APS, QMS, test stations, IoT

Cross-cutting

Governance and security

- Identity and access
- Audit logs
- Model monitoring
- Cost allocation
- ISO 42001
- Data classification

Principle: keep the SAP core untouched and do not rebuild MES/PLM — AI reads data, makes recommendations, and acts only after human approval

LITEON AI platform concept: keep the SAP core untouched and do not rebuild MES/PLM

Period	Deliverable
Days 1–30 | Listen	AI asset map and current-state diagnosis
Days 31–60 | Decide	AI platform blueprint, financial assumptions for top 5 use cases
Days 61–90 | First results	Demonstrable results, first quarterly report
Days 91–180 | Scale	New use-case launch time down to weeks
